### DETAILED ACTION

The examiner acknowledges the applicant's submission of a RCE dated 6/22/2009.

### *Conclusion*

A. Subject Matter Considered Allowable

**Claims 1-5 and 7-21** are allowable.

The primary reasons for allowance of **claim 1** in the instant application is the combination with the inclusion in these claims that **“to copy any data stored in other portions of the first physical address region, originally associated with the logical address region containing the logical address, to corresponding locations of the second physical address region, and to move the pointer in a round-robin manner to indicate a location of a next one of the plurality of queuing physical address regions in the block queue so that the location of the first physical address is placed, following said modification of the memory address mapping table, at a rear of the block queue”**. The prior art of record neither anticipates nor renders obvious the above recited combination.

The primary reasons for allowance of **claims 16 and 21** in the instant application is the combination with the inclusion in these claims that **“following a modification of the memory address mapping table in relation to a first logical address, and prior to said copying of the data from the first physical address to the second physical address, said similarity criterion is whether the second WRITE instruction relates**

Art Unit: 2185

**to a logical address corresponding to a location designated by the first logical address of the data to be copied, and when the similarity criterion is satisfied, aborting said copying operation and instead writing data specified by the second WRITE instruction to the second physical address".** The prior art of record neither anticipates nor renders obvious the above recited combination.

**Claims 2-5, 7-15 and 17-20** are allowable due to their dependency on the allowed claims 1, 16 and 21.
